Order at bartramsgarden.org/shop beginning April 9
All orders are pickup-only
Thank you for supporting Bartram’s Garden!
CONTENTS

The following plant nursery highlights have been selected by the growers at Bartram’s Garden and the Sankofa Community Farm at Bartram’s Garden. The assemblage of highlighted plants is meant to help connect you to the spirit of the past, present, and future of these grounds and beyond. From plants that made these lands their home for centuries to crops that were brought over seas through trade or through the forced or voluntary movement of peoples, plants tell stories about who we have been, who we are, and who we can become. We are a place of many stories and we invite you to grow with us!

粉尘PLEASE NOTE: The plants listed in each category represent highlights of what will be available for purchase in Spring and/or Summer 2021. For a current list of spring plants available beginning April 9, please see page 9.

HOW TO ORDER

Beginning April 9, all plants can be ordered online at bartramsgarden.org/shop or by contacting the Bartram’s Garden Welcome Center at 215 729 5281 x120.

All plant orders are pick-up only. You will be notified by email when your order is ready for pickup at Bartram’s Garden in Southwest Philadelphia. (Check your spam folder!) Pickups are contactless, outdoors, and socially distanced; all staff and visitors to the Garden are required to wear a mask that covers their nose and mouth.

Orders with plants that are not picked up within one week of the ready for pickup email will be refunded. Our plants are sold when they are seasonally appropriate, so we want to ensure they get homes in time for planting.

Stay tuned for the arrival of more seasonally appropriate plants as temperatures rise!

The Upper Kitchen Garden includes examples of plants a family could have grown to sustain their needs in a Philadelphia garden prior to 1830. We include plants that were new and unusual introductions to this continent, such as tomatoes and peppers. A typical kitchen garden prior to the mid-nineteenth century would have included a variety of what were referred to as “herbs”: vegetables, plants used in dyeing and textiles, medicinal and culinary plants, and plants used for cosmetics and household cleaners. Today, we grow a mix of all these categories, as well as seed crops to help preserve varieties that have survived from this time.

### Kitchen Garden Classics

#### Vegetables
- Brunswick cabbage - Brassica sp.
- Green glaze collards - Brassica sp.
- Tennis ball lettuce - Lactuca sativa ‘Tennis Ball’
- Raisin Cupcinjer Pea - Pisum sativum
- Red Wethersfield Onion - Allium cepa
- Patty pan squash - Cucurbita pepo
- Listada di Gandia Eggplant - Solanum melongena
- Carolina Sieva Lima Bean - Phaseolus lunatus ‘Carolina’
- Plait de Haiti Tomato - Solanum lycopersicum
- Willings Barbados Pepper - Capsicum annuum ‘Willings Barbados’

#### Herbs
- Valerian - Valerian officinalis
- Fennel - Foeniculum vulgare
- Elecampane - Inula helenium
- Dill - Anethum graveolens
- Caraway - Carum carvi
- Catnip - Nepeta cataria

Beginning April 9, visit [bartramsgarden.org/shop](http://bartramsgarden.org/shop) to order seasonally available plants. See the list on page 9 for availability for spring planting. Not all plants featured here are available on April 9.
The Common Flower Garden is sited on the Schuylkill-facing side of the Bartrams’ home, directly across from their front porch. It contains both native and newly introduced species of flowering plants. During the 18th and 19th century, plants were shared with the Bartrams from all over the world; this garden is curated to represent their most intriguing specimens.

**Annual**
- Sweetpea - Lathyrus odoratus ‘Culpani’
- Sensitive Plant - Mimosa pudica (Warm Annual or Houseplant)

**Tender Bulb or Houseplant**
- Aztec Lily - Sprekelia formosissima

**Perennial**
- Globe Thistle - Echinops ritro
- Blackberry Lily - Iris domestica
- Seashore Mallow - Kosteletzkya virginica
- Blue Cardinal Flower - Lobelia siphilitica

**Tree**
- Franklin Tree - Franklinia alatamaha

Beginning April 9, visit bartramsgarden.org/shop to order seasonally available plants. See the list on page 9 for availability for spring planting. Not all plants featured here are available on April 9.
Wilderness Garden Varieties

The Wilderness Garden is actually a series of gardens, an arboretum, and a park space; its name comes because the Bartram nursery business was founded on plant collecting in the American wilderness. Wilderness gardens were also a style in European estate gardening that likely influenced the layout of the lower part of the garden since at least the 1760s, though there isn’t much historical evidence of the layout of this part of the original gardens. Today’s designs are based on studying natural ecosystems, the Bartrams’ letters, and nursery catalogs of the time. Books from the Bartrams’ library and knowledge gained from Indigenous First Nations of North America from the territories where these plants were collected also inform the design. John Bartram’s nursery was one of the earliest commercial enterprises to sell North American plants as individuals or fragments. The family made great efforts to observe and record details of relationships within the plants’ original habitat, sometimes but not always noting ethnobotanical relationships.

Aquatics
- Yellow Pitcher Plant - Sarracenia flava
- Venus Fly Trap - Dionaea muscipula
- Yellow Lotus - Nelumbo lutea
- Fragrant Water Lily - Nymphaea odorata

Shrubs
- Pinxterbloom Azalea - Rhododendron periclymenoides
- Flame Azalea - Rhododendron flammeum
- Anise Tree - Illicium floridanum

Perennials
- Partridge Pea - Chamacrista fasciculata
- Golden Ragwort - Packera aurea
- Bloodroot - Sanguinaria canadensis

Trees
- Pawpaw - Asimina triloba
- Fringe Tree - Chionanthus virginicus
- Flowering Dogwood - Cornus florida
- Redbud - Cercis canadensis

Annuals and Biennials
- Spotted Bee Balm - Monarda punctata
- Digitalis purpurea

Beginning April 9, visit bartramsgarden.org/shop to order seasonally available plants. See the list on page 9 for availability for spring planting. Not all plants featured here are available on April 9.
When you step into the Ann Bartram Carr Garden you are entering an interpretation of an early 19th-century public exhibition garden. Named for John Bartram’s granddaughter, Ann Bartram Carr, who first established this garden space as a public entrance to Bartram’s Garden, it was designed to feature newly imported plant species from around the globe alongside the most fashionable plants of the time. In this garden, you can find living examples of that moment in plant history as well as observe the wildlife that still depends on many of these plants today.

**Ann Bartram Carr Garden Choices**

**Annuals**
- Snow on the Mountain - Euphorbia marginata
- Black Flowered Lotus - Lotus jacobaeus
- Angel's Trumpet - Datura metel

**Tender Perennials**
- Scented Geranium - Pelargonium sp.

**Perennials**
- Fragrant Plantain Lily - Hosta plantanagea
- Hardy Begonia - Begonia grandis
- Chrysanthemum - Chrysanthemum indica

Beginning April 9, visit [bartramsgarden.org/shop](http://bartramsgarden.org/shop) to order seasonally available plants. See the list on page 9 for availability for spring planting. Not all plants featured here are available on April 9.
Many of the plants that are grown at Bartram’s Garden play an integral role in the surrounding environment and our health. Some of these plants, such as pollinator plants, support our food web and nurture the ecosystem. Pollinator plants provide nectar for insects and birds. They provide havens for predator insects that keep other insect populations at bay that may devour our crops. Here is a selection of plants from the moon garden at Eastwick Pavilion, specifically planted for moths. Moths are active at night, so they are attracted to pollinator plants that are pale colored and night blooming or night scented. Check out this list of pollinator plants we have for sale that are growing at the Eastwick Pavilion.

There were once as many as ten greenhouses at Bartram’s Garden. The first greenhouse in 1760 was heated by the Franklin stove, and subsequent greenhouses were heated by wood or after 1820, anthracite coal. The greenhouses were situated around the main house. Flash forward to modern day: the working greenhouses are insulated with plastic bubbles and heated with electric overhead heaters, sequestered in the southwest portion of the garden.

Currently, there are two greenhouses for Bartram’s Garden and the Sankofa Community Farm and floor space to raise nursery crops in the modern day complex. The plants grown in the Bartram’s Greenhouse are for either the landscape or for nursery sales to the general public—like you! In the Sankofa Greenhouse, crops are grown for the farm and community gardens. Learn more about the crops Sankofa grows by checking out the next page. The seed and plant trade lives on!

Veggies for Spring
A few tasty greens to try!
Red Russian Kale - Brassica sp.
Red Sails Lettuce - Latuca sativa
Champion Collards - Brassica sp.
Forellenschluss Lettuce - Latuca sativa

Fruiting Shrubs for Small Spaces
Compact shrubs that can function in a large container!
Lowbush blueberry - Vaccinium angustifolium
Elderberry - Sambucus canadensis

Container Garden Tomatoes (Bush)
These tomatoes will stay relatively compact in your edible container gardens!
Minibel Tomato - Solanum lycopersicum ‘Minibel’
Principe Borghese Tomato - Solanum lycopersicum ‘Principe Borghese’
Heinz Tomato - Solanum lycopersicum ‘Heinz’

Beginning April 9, visit bartramsgarden.org/shop to order seasonally available plants. See the list on page 9 for availability for spring planting. Not all plants featured here are available on April 9.
Sankofa Community Farm prioritizes natural agriculture techniques in our farming and we specialize in the raising of crops of the African and African-American Diaspora. As a practice of community healing we provide and teach about the crops that have identified and sustained our community over centuries. Here are a few selections that we invite you to try growing at home.

- Vegetables
  - Paul Robeson Tomato - Solanum lycopersicum ‘Paul Robeson’
  - Okra - Abelmoschus esculentus
  - Black sesame - Sesamum indicum

Plants available April 9 include:
Ferns | Flowering and Foliage Perennials | Grass | Houseplants
Shrubs | Trees | Vegetables | Vines

Ferns
Dryopteris marginalis
Matteuccia pensylvanicum
Osmunda cinnemomea
Osmunda regalis var spectabilis
Polystichum acrostichoides
Marginal Shield Fern
Ostrich Fern
Cinnamon Fern
Royal Fern
Christmas Fern

Flowering and Foliage Perennials
Asarum canadense
Aster novae-angliae
Claytonia virginica
Coreopsis tripteris
Echinacea paradoxa
Eupatorium dubium ‘Little Joe’
Geranium macrorrhizum
Helleborus foetidus
Hepatica acutiloba
Heuchera villosa ‘Autumn Bride’
Iris cristata ‘Alba’
Iris versicolor ‘Purple Flame’
Jeffersonia diphylla
Lilium superbum
Lobelia cardinalis
Maianthemum racemosum
Mertensia virginica
Monarda bradburiana
Monarda didyma
Oenothera fruticosa
Opuntia cespitosa
Pachysandra procumbens
Packera aurea
Phlox ‘May Breeze’
Phlox stolonifera
Podophyllum peltatum
Polygonatum biflorum
Polygonatum commutatum
Primula meadia
Pycnanthemum flexuosum
Pycnanthemum muticum
Rudbeckia hirta
Rudbeckia maxima
Sanguinaria canadensis
Wild Ginger
New England Aster
Virginia Spring Beauty
Tall Coreopsis
Yellow Coneflower
Joe Pye Weed ‘Little Joe’
Bigroot Geranium
Stinking Hellebore
Sharp Lobed Hepatica
Hairy Alum Root
